Yara Mamdouh Khfagi

Full Stack Developer | .NET & Node.js

Shibin El Qanater, Qalyubia, Egypt | 01015549475 | yarakhfagi@gmail.com
LinkedIn: linkedin.com/in/yara-khfagi/ | GitHub: github.com/Yara1mamdouh

PROFESSIONAL SUMMARY

Computer Science and Artificial Intelligence student at Benha University with hands-on experience building full-stack web applications using .NET and Node.js. Skilled in C#, ASP.NET Core, Entity Framework Core, SQL, JavaScript, React, Angular, HTML, CSS, and Bootstrap, with practical training in .NET, MEAN Stack, and Node.js. Seeking an internship or junior full-stack/backend development opportunity.

TECHNICAL SKILLS

Programming Languages: C#, C++, Java, Python, JavaScript, SQL
Backend: ASP.NET Core, .NET, Node.js
Frontend: HTML5, CSS3, JavaScript, React, Angular, Bootstrap
Database & ORM: SQL Server, SQLite, Entity Framework Core
Tools: Git, GitHub, Visual Studio Code, Visual Studio
Core Concepts: OOP, LINQ, REST APIs, CRUD, Data Structures & Algorithms

EDUCATION

Oct 2023 – Present Bachelor of Computer Science and Artificial Intelligence, Benha University
Expected Graduation: 2027 | GPA: 3.55

TRAINING & CERTIFICATIONS

Digital Egypt Pioneers Initiative (DEPI) — Full Stack .NET Developer — Round 4
National Telecommunication Institute (NTI) — MEAN Stack — Summer Training
Gulf of Suez Petroleum Company (GUPCO) — Technical Training
MTEC Academy — Full Stack Node.js — In Progress

PROJECTS

CarePoint Pro — Integrated Clinic Management System — Angular / Node.js
• Developed an integrated clinic web application using Angular and Node.js, providing a structured platform for managing clinic operations and connecting frontend interfaces with backend services.

Cravers — Full-Stack Web Application
• Developed a full-stack web application with a responsive user interface and structured application logic. Implemented core user-facing functionality and integrated frontend components with backend services.

Code Academy — Angular / Bootstrap
• Built an educational platform for organizing programming and computer science curriculum content. Implemented interactive learning components, responsive layouts, and structured course and unit navigation.

Blood Bank Management System — .NET / ASP.NET Core
• Developed a blood bank management application using .NET technologies. Implemented backend functionality for managing blood-bank data, CRUD operations, and database integration.

Restaurant Recipe — Node.js
• Built a restaurant and recipe application using Node.js. Implemented backend application logic and REST API functionality for handling restaurant and recipe data.

Book Rental System — Python / Tkinter / SQLite / Faker / ReportLab
• Developed a desktop book rental system with a graphical interface, SQLite database integration, sample data generation using Faker, and PDF report generation using ReportLab.

Java Desktop Application — Java
• Developed a desktop sports store application using Java, implementing core application functionality and object-oriented programming concepts.

Quran Recitation Website — HTML / CSS / Bootstrap / JavaScript
• Built a responsive website for Quran recitation using HTML, CSS, Bootstrap, and JavaScript.

Restaurant Website — PHP / HTML / CSS
• Developed a restaurant website using PHP with structured web pages and frontend styling.

ACTIVITIES

Jan 2024 – Feb 2024 Problem Solving Bootcamp, Benha University
• Participated in an intensive problem-solving bootcamp organized by Benha University.
• Practiced algorithmic thinking and competitive programming fundamentals.
• Solved coding challenges under time constraints and strengthened logical thinking and teamwork.
